Financial Consent

ASSIGNMENT OF BENEFITS/BILLING AUTHORIZATION CONSENT:

Private Insurance: The cost of our services will be billed to your insurance company. If your private insurance denies coverage, or does not pay within 90 days of billing, you are financially responsible and will be billed directly for services rendered. The amount of fees for services will vary depending on changes in the patient's medical condition, progress, and physician order(s).

_____ Private Pay: You are financially responsible of all fees due at time of service. The amount of fees for services may vary depending on changes in the patient's medical condition, progress, and physician order(s).

State Insurance: The cost of our services will be billed to your insurance company. If your state insurance denies coverage, or retro disenrolls the patient, you are financially responsible and will be billed directly for services rendered. The amount of fees for services will vary depending on changes in the patient's medical condition, progress, and physician order(s).

_____ For those families where parents are separated or divorced, the parent who brings the child or children to the office visit and authorizes treatment is responsible for payment(s). Payments are due when services are rendered. If the divorced/custodial decree makes the non-custodial parent/guardian responsible for partial or all medical costs, it will be the responsibility of the authorizing parent to collect payment from the other parent.

2. NOTICE OF PATIENT RESPONSIBILITY FOR CO-PAYS, PERCENTAGES & DEDUCTIBLES:

Southern Pediatric Clinic will attempt to verify your insurance benefits and eligibility. The information we receive is based on the information you and your insurance company provide to us. As a courtesy, we will bill your insurance company for their portion of your bill. Ultimately it is your responsibility to see that we are paid appropriately by your insurance company. If the information given to us by you or your insurance company proves to be inaccurate and a balance remains, you will be billed for that balance and are responsible for payment within thirty (30) days unless you set up a payment plan with our billing specialists.

BY SIGNING BELOW, YOU INDICATE THAT:

- 1. You agree with the provisions of the payment source as described above. You understand that if you accept the services we have provided, you are ultimately responsible for payment. Should it be necessary to use collection services, any additional fees will also be your responsibility.
- 2. You authorize payment of any insurance benefits directly to Southern Pediatric Clinic.
- 3. You authorize the release of medical information to and from Southern Pediatric Clinic.
- 4. You agree to pay all co-pays, percentages, and deductibles at the time of service.

I have the right to request that Southern Pediatric Clinic restricts how it uses or discloses my PHI to carry out TPO. However, the practices are not required to agree to my requested restrictions, but if it doesn't, it is bound by this agreement. By signing this form, I am consenting to the practice's use and disclosure of my PHI to carry out TPO. I my revoke my consent in writing, except to the extent that which the practice has already made disclosures upon my prior consent. If I do not sign this consent, providers for Southern Pediatric Clinic may decline to provide treatment for my child(ren).

CELL PHONE USE POLICY

The purpose of this policy is to outline the acceptable use of cellular phone ("cellphones") and other communication devices, including but not limited to, mobiles phones, iPhones, iPads, iPods, tablets, or any other wireless device (collectively referred to as "communication devices") at *Southern Pediatric Clinic, LLC*. These rules are in place to protect the workers and *Southern Pediatric Clinic, LLC*, along with the privacy of each of our patients. Inappropriate use of communication devices may harm others within the office by violating HIPAA laws and regulations.

1. Who this Policy Applies To:

This Policy applies to patients that are being seen within the office and their family members.

2. What devices this Policy Applies To: (Video recording or pictures during vaccinations is PROHIBITED)

- a. All devices that can be used for recording.
- b. All devices that can be used for communicating with others.
- c. All devices that may hinder the quality of care the patient may receive.

3. <u>Permitted Use:</u>

The devices mentioned can be used in the lobby if needed. However, it is recommended that the patient or family members be conscious of others that may be in the lobby.

4. Violations of This Policy:

Patients or family members that violate this policy may be asked to leave and are subject to dismissal depending on circumstances.

I have read and will abide by the terms of this policy regarding the use of communication devices in this office.

HIV/STI Infectivity Testing

Date

Child's Name

Date of Birth

It is required for physicians to attempt to obtain consent for HIV/STI infectivity testing per healthcare recommendations between 16 to 18 years of age.

The results of these tests will be kept confidential and will only be released to medical personnel directly responsible for my care and treatment, to the exposed health care worker for his or her medical benefit only and to others only as required by law.

Purpose:

To address the HIV/STI epidemic in Georgia in four overarching areas: 1) by reducing new infections, 2) increasing access to care, 3) improving health outcomes for people living with HIV, and 4) promoting health equity. Standard performance measures for HIV/STI prevention programs that are consistent with the focus of the National HIV/AIDS Strategy on improving performance and accountability will be used to evaluate the performance and effectiveness of these activities.

The CDC believes that opt-out screening for HIV/STI:

- Will help more people find out if they have HIV
- Will help those infected with HIV find out earlier, when treatment works best
- Can further decrease the number of babies born with HIV
- Can reduce stigma associated with HIV testing
- Will enable those who are infected to take steps to protect the health of their partners

Refusal & Signature

By signing this document, I hereby

consent to HIV/STI Testing _____ refuse consent to HIV/STI Testing

for the patient listed above. I understand that at any time I may request testing from my healthcare provider.

Vaccines for Children Program

Provider: Southern Pediatric Clinic

A record must be kept in the healthcare provider's office that reflects the status of all children 18 years of age or younger, who receive immunizations with vaccines supplied by state programs. The record my be completed by the parent, guardian or individual of record, or by the healthcare provider. The same record may be used for all subsequent visits s long as the child's eligibility status has not changed. <u>While verification of responses is not required, it is necessary to retain this or a similar record for each child receiving vaccine(s).</u>

NOTE: IF you do not have health insurance or if your insurance carrier does not cover vaccines, you can receive a vaccine provided by the Vaccines for Children Program. A fee of \$21.93 per shot will be charged at the time of service. Only children 18 years and younger are eligible for this program.

Meningococcal ACWY Vaccine: What You Need to Know

Many Vaccine Information Statements are available in Spanish and other languages. See www.immunize.org/vis

Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite www.immunize.org/vis

1 Why get vaccinated?

Meningococcal ACWY vaccine can help protect against **meningococcal disease** caused by serogroups A, C, W, and Y. A different meningococcal vaccine is available that can help protect against serogroup B.

Meningococcal disease can cause meningitis (infection of the lining of the brain and spinal cord) and infections of the blood. Even when it is treated, meningococcal disease kills 10 to 15 infected people out of 100. And of those who survive, about 10 to 20 out of every 100 will suffer disabilities such as hearing loss, brain damage, kidney damage, loss of limbs, nervous system problems, or severe scars from skin grafts.

Anyone can get meningococcal disease but certain people are at increased risk, including:

- Infants younger than one year old
- Adolescents and young adults 16 through 23 years old
- People with certain medical conditions that affect the immune system
- Microbiologists who routinely work with isolates of *N. meningitidis*, the bacteria that cause meningococcal disease
- People at risk because of an outbreak in their community

Meningococcal ACWY vaccine

Adolescents need 2 doses of a meningococcal ACWY vaccine:

• First dose: 11 or 12 year of age

2

Second (booster) dose: 16 years of age

In addition to routine vaccination for adolescents, meningococcal ACWY vaccine is also recommended for **certain groups of people**:

- People at risk because of a serogroup A, C, W, or Y meningococcal disease outbreak
- People with HIV
- Anyone whose spleen is damaged or has been removed, including people with sickle cell disease
- Anyone with a rare immune system condition called "persistent complement component deficiency"
- Anyone taking a type of drug called a complement inhibitor, such as eculizumab (also called Soliris[®]) or ravulizumab (also called Ultomiris[®])
- Microbiologists who routinely work with isolates of *N. meningitidis*
- Anyone traveling to, or living in, a part of the world where meningococcal disease is common, such as parts of Africa
- College freshmen living in residence halls
- U.S. military recruits

3 Talk with your health care provider

Tell your vaccine provider if the person getting the vaccine:

 Has had an allergic reaction after a previous dose of meningococcal ACWY vaccine, or has any severe, life-threatening allergies.

In some cases, your health care provider may decide to postpone meningococcal ACWY vaccination to a future visit.

Not much is known about the risks of this vaccine for a pregnant woman or breastfeeding mother. However, pregnancy or breastfeeding are not reasons to avoid meningococcal ACWY vaccination. A pregnant or breastfeeding woman should be vaccinated if otherwise indicated.

U.S. Department of Health and Human Services Centers for Disease Control and Prevention People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover before getting meningococcal ACWY vaccine.

Your health care provider can give you more information.

4

Risks of a vaccine reaction

- Redness or soreness where the shot is given can happen after meningococcal ACWY vaccine.
- A small percentage of people who receive meningococcal ACWY vaccine experience muscle or joint pains.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

5 What if there is a serious problem?

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call **9-1-1** and get the person to the nearest hospital.

For other signs that concern you, call your health care provider.

Adverse reactions should be reported to the Vaccine Adverse Event Reporting System (VAERS). Your health care provider will usually file this report, or you can do it yourself. Visit the VAERS website at **www.vaers.hhs.gov** or call **1-800-822-7967**. VAERS is only for reporting reactions, and VAERS staff do not give medical advice.

6 The National Vaccine Injury Compensation Program

The National Vaccine Injury Compensation Program (VICP) is a federal program that was created to compensate people who may have been injured by certain vaccines. Visit the VICP website at www.hrsa.gov/vaccinecompensation or call 1-800-338-2382 to learn about the program and about filing a claim. There is a time limit to file a claim for compensation.

7 How can I learn more?

- Ask your healthcare provider.
- Call your local or state health department.
- Contact the Centers for Disease Control and Prevention (CDC):
- Call 1-800-232-4636 (1-800-CDC-INFO) or
- Visit CDC's www.cdc.gov/vaccines

Vaccine Information Statement (Interim) Meningococcal ACWY Vaccines

8/15/2019 | 42 U.S.C. § 300aa-26

Meningococcal B Vaccine: What You Need to Know

Many Vaccine Information Statements are available in Spanish and other languages. See www.immunize.org/vis

Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite www.immunize.org/vis

1 Why get vaccinated?

Meningococcal B vaccine can help protect against **meningococcal disease** caused by serogroup B. A different meningococcal vaccine is available that can help protect against serogroups A, C, W, and Y.

Meningococcal disease can cause meningitis (infection of the lining of the brain and spinal cord) and infections of the blood. Even when it is treated, meningococcal disease kills 10 to 15 infected people out of 100. And of those who survive, about 10 to 20 out of every 100 will suffer disabilities such as hearing loss, brain damage, kidney damage, loss of limbs, nervous system problems, or severe scars from skin grafts.

Anyone can get meningococcal disease but certain people are at increased risk, including:

- Infants younger than one year old
- Adolescents and young adults 16 through 23 years old
- People with certain medical conditions that affect the immune system
- Microbiologists who routinely work with isolates of *N. meningitidis*, the bacteria that cause meningococcal disease
- People at risk because of an outbreak in their community

2 Meningococcal B vaccine

For best protection, more than 1 dose of a meningococcal B vaccine is needed. There are two meningococcal B vaccines available. The same vaccine must be used for all doses.

Meningococcal B vaccines are recommended for people 10 years or older who are at increased risk for serogroup B meningococcal disease, including:

- People at risk because of a serogroup B meningococcal disease outbreak
- Anyone whose spleen is damaged or has been removed, including people with sickle cell disease

- Anyone with a rare immune system condition called "persistent complement component deficiency"
- Anyone taking a type of drug called a complement inhibitor, such as eculizumab (also called Soliris[®]) or ravulizumab (also called Ultomiris[®])
- Microbiologists who routinely work with isolates of *N. meningitidis*

These vaccines may also be given to anyone 16 through 23 years old to provide short-term protection against most strains of serogroup B meningococcal disease; 16 through 18 years are the preferred ages for vaccination.

3

Talk with your health care provider

Tell your vaccine provider if the person getting the vaccine:

- Has had an allergic reaction after a previous dose of meningococcal B vaccine, or has any severe, life-threatening allergies.
- Is pregnant or breastfeeding.

In some cases, your health care provider may decide to postpone meningococcal B vaccination to a future visit.

People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover before getting meningococcal B vaccine.

Your health care provider can give you more information.

U.S. Department of Health and Human Services Centers for Disease Control and Prevention

4 Risks of a vaccine reaction

 Soreness, redness, or swelling where the shot is given, tiredness, fatigue, headache, muscle or joint pain, fever, chills, nausea, or diarrhea can happen after meningococcal B vaccine. Some of these reactions occur in more than half of the people who receive the vaccine.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

5

What if there is a serious problem?

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call **9-1-1** and get the person to the nearest hospital.

For other signs that concern you, call your health care provider.
